PROFILE

- Software engineering student at university of Ottawa
 - seeking CO-OP internship in technology
 - Strong interest in Web development , software, mobile and data analysis
-

SKILLS

Technicals

- Web Design: HTML, CSS
- Programming Languages: Python, Java, JavaScript
- Databases: SQL, SQLite, Firabase
- Mobile Development: Android Studio
- Frameworks: Streamlit, Django, React.Js, Next.Js
- Data analysis/visualizations
- Software Design: UML (class, sequence, and activity diagrams)
- Testing & Quality: JUnit (unit testing)
- Graphic Design: Adobe Photoshop, Illustrator
- Collaborative Tools: Word, Excel, PowerPoint, Google Workspace
- Development Tools: Git/GitHub, Visual Studio Code, Databricks, Posit Connect

Softs & Professional

- Analytical thinking and problem-solving
- Attention to detail and accuracy
- Teamwork and cross-functional collaboration
- Adaptability and quick learning
- Time management and meeting deadlines

PROFESSIONAL EXPERIENCE

E-Learning Developer

January 2026 – In progress

Public Health Agency of Canada (ASPC/PHAC)

- Created and modified online learning courses based on established standards using Python, HTML, CSS, and JavaScript.
- Ensured that products were fully accessible in compliance with WCAG 2.2 AA standards.

Software Developer (Intern)

June 2025 – August 2025

Public Health Agency of Canada (ASPC/PHAC)

- Develop and deploy the mpox and trends pages for wastewater surveillance (wastewater monitoring) to detect and track the spread of infectious diseases.
- Design and enhance interactive interfaces with Python/Streamlit, enabling users to add, delete, and validate data easily.
- Integrate and automate data management in Databricks (SQL queries, data cleaning, table structuring).
- Deploy applications continuously on Posit Connect to ensure accessibility for public health teams.
- Extract and harmonize data automatically from PDFs into structured JSON format.
- Implement validation mechanisms to ensure the quality and reliability of data before analytical use.
- Use Git/GitHub for version control, team collaboration, and code review.

ACADEMIC & PERSONAL PROJECTS

Scientific Calculator

- Develop a scientific calculator in HTML, CSS and JavaScript.
- Implement advanced features such as trigonometric, logarithmic and exponential functions.
- Create an intuitive user interface for ease of use.

Image Background Removal

- Developed an application using Streamlit in Python to remove image backgrounds.
- Enabled users to upload an image, preview the result after processing, and download the image without a background.
- Created a simple and intuitive interface to ensure ease of use.

Travel Agency Website

- Create a travel agency website using HTML, CSS and JavaScript.
- Design and develop all site features, including destination descriptions and customer reviews.
- Work with a team of 6 people to define the needs and functionalities of the site.

Mobile Application “uTaste”

- Designed and developed an Android application for managing culinary recipes with different user roles (Administrator, Chef, Server).
- Implemented authentication, recipe creation/editing, and user management features.
- Integrated a SQLite database for local persistence and REST JSON requests to fetch nutritional data via OpenFoodFacts.
- Completed full UML modeling (class, activity, and sequence diagrams).
- Wrote JUnit unit tests to validate user and ingredient management.
- Collaborated effectively in a six-member team using GitHub (branches, commits, tagged deliverables) and video demonstrations.

SmartBudget – Web-Based Budget Management Application

Technologies: React, Next.js, Firebase, REST API

- Designed and developed a web application for personal finance management.
- Implemented a secure authentication system.
- Managed real-time data using Firebase.
- Built an interactive dashboard to track income and expenses.
- Developed a responsive design optimized for both mobile and desktop devices.

EDUCATION

University of Ottawa

Software Engineering

Septembre 2024- In progress

ISM Digital Campus

Software Engineering in Senegal

September 2023 - July 2024

Certifications

- **IT Essentials: PC Hardware and Software — Cisco Networking Academy**
Computer assembly, maintenance, and troubleshooting.
- **Violence Prevention, Right of the Person and Workplace Respect**
Awareness of human rights and inclusive practices.

ADDITIONAL INFORMATION

- **Languages:** English-Intermediate French: advanced
